CONTROL U. S. OFFICIALS ONLY

Alongside the pier south of the dry docks were observed four destroyers of the Derzki or Lenin class. 1. Murmansk Harbor One Russian vessel of approximately 9,000 tons was undergoing repairs in the dry dock. Several fast trawlers were noted in the harbor in addition to a number of smaller merchant men not yet in commission. One Russian vessel was observed taking on lumber. 5. Radar Installations Radar stations were observed at Stat Navolok. These appeared as round concrete objects on the hill side gun emplacements, though no artillery pieces were observed. 7. Read Construction A road was observed under construction on the east side of the Kola fjord. This extended from Murmansk itself to Wolokowaya Bay.	
In the naval shipyard at Rosta In the naval shipyard at Rosta were observed four medium sized submarines. They were of the same true as those observed at Salny Point. One was painted with red lead which had been newly constructed. So the Derzki or Lenin class. Alongside the pier south of the dry docks were observed four destroyers of the Derzki or Lenin class. In Murmansk Harbor One Russian vessel of approximately 9,000 tons was undergoing repairs in the dry dock. Several fast trawlers were noted in the harbor in addition to a number of smaller merchant men not yet in commission. One Russian vessel was observed taking on lumber. 5.
